

# UnboundEd

## Curriculum Implementation

Whether you're just getting started with a new curriculum or need to get implementation back on track, we work shoulder-to-shoulder with you to build a shared vision, an actionable plan, and the systems necessary for your success.

“ Every single teacher is using the curriculum, and they are using it with... integrity. We are starting to see more sophisticated decision-making that's taking place... [about] supporting all students in accessing that grade-level work. Students want to do the work, so we are seeing more students participate in all of our curriculum. ”

— Cresta McIntosh, Associate Superintendent of Educational Services, MPUSD

## Our Curriculum Implementation Approach

### PLAN FOR SUCCESS

Develop a concrete, actionable plan for success and implement it shoulder-to-shoulder with UnboundEd.

### LEADERSHIP CAPACITY AND COHERENCE

Get everyone organized around a shared vision and plan; then grow skills and mindsets as we go.

### CONTINUOUS IMPROVEMENT AND DATA THAT MATTERS

Set up feedback, collaboration, and measurement structures to monitor implementation progress in rich detail at every step.

### SUSTAINABLE IMPACT

Ensure that what begins as implementation success translates to lasting growth at every level of the system.

### BUY-IN

Foster shared ownership so that everyone is set up for success and stays engaged long-term.

# Successful Implementation for Lasting Impact

Student success starts with the effective implementation of high-quality instructional materials (HQIM). But materials rejection, lack of buy-in, and uneven outcomes tell us the conventional approach isn't cutting it. And getting it right isn't simple or easy; it takes technical expertise and steady focus. UnboundEd offers the comprehensive support you need — tailored to your unique context — to ensure your curriculum investment succeeds.

We partner with districts to organize curriculum implementation initiatives, build leadership capacity, and foster coherence across each school and classroom to ensure every single student has access to effective instruction. And by building the skills and mindsets of everyone involved throughout the process — from the central office to the classroom — we ensure that what begins as curriculum implementation success translates to lasting impact at every level.

## What to Expect

UnboundEd engages districts in a transformative curriculum implementation process customized to their context, systems, and needs, equipping leaders to deliver effective instruction — what we call GLEAM® (grade-level, engaging, affirming, and meaningful) instruction. With expert support, leaders create the cross-functional collaboration structures needed to implement HQIM successfully and bring GLEAM instruction to life in every classroom.

### Comprehensive District Team Support

We work alongside district leaders to develop and implement a plan that establishes the conditions and systems for effective curriculum implementation.

### School Leader Support

We support school leaders in understanding the design of their curriculum, engaging in classroom observations, and providing curriculum-aligned feedback.

### Professional Learning

Leaders participate in targeted, job-embedded professional learning to support and build knowledge on curriculum implementation.

### School Walkthroughs

Leaders engage in classroom walkthroughs to collect and analyze data, enabling them to monitor curriculum implementation across their district.

Connect with us to learn how you can create the conditions for effective instruction.
